3. Interested to improve your knowledge in Freight Forwarding

Logistics market seen growing 10.5% a year, to reach \$215,000,000: Industry Study

Cyan has been focusing on one of the important shift the world of logistics is taking, this is one of the unorganized industries which could not leverage technologies due to its business complexities. All the technologies giants have now shifted their focus towards this sector as the world is witnessing how this sector became the early mover to recover in COVID very quickly.

Our **LOGISCOPE** deep domain expertise in the areas of industry practices recognize this and have come up with models to solve this. Cyan have come up with programs to bridge this in educational sectors to drive the focus of domain knowledge and make India as a favorite market place for the world of logistics.

We are tying up with educational institutions to create jobs in the market and also our bridge training with our 48 hours* Logistics domain training. (*Weekend)

How LOGISCOPE Bringing the Non-Engineering Institutions Together On This Industry

One of the major advantage we are providing to the institutions is with the direct domain expertise of the Logistics Businesses, Our focused training programs ensures the following...

- Students are trained on the domain and clearly understand the career path alongside income opportunities.
- Our experts prepare them to place in MNC's which are recognized by FIATA – Federation

Our batches of students who went to become Industry Professionals.

This is a great career path for students who invest their career into logistics markets. LOGISCOPE – Trains /Prepare & Place students in markets.

*All Manufacturing
Giants Eyeing
Logistics Digital
Transformation*

Leveraging instruments enabling smart cities like Energy Efficiency, Demand Management, Improved Access to Information, Environmental Sustainability, use of Clean Technology, use of ICT, participation of Private Sector, Citizen Participation and Smart Governance.

It is projected that urban India will contribute about 75%2 of national GDP in the next 15 to 20 years while another 3003 million people get added to the existing 300million dwelling in Indian urban centers.

How Jobs Will Be Created Towards 2021 - 25

- Its not a limited Industry, it's a ocean of opportunities.
- Employment of logistics is often mis-understood as hard core labor intensive work.
- There are many roles in logistics which requires "Internet Of things"
- It's a stringent process industry, hence not many understood.
- Salary scales at good and many use cases are there about businesses providing long term promising career growths.
- Many countries across the world prefer Indians over other Asians due to deep domain expertise.
- People who successfully start their logistics careers usually get international exposure.
